

Amazon Web Services

INVOICE

Invoice Number: INV-20251130-7674
Invoice Date: November 30, 2025
Billing Period: October 31, 2025 - November 30, 2025
Account ID: 114713347049
Payment Status: ■■ OVERDUE

Spending Analysis Summary

Efficiency Level: Very stupid
Architecture Type: Serverless
Burning Style: Vertical
Timeline: 30 days

Service Charges

Service	Type	Qty	Days	Unit Cost	Total
Lambda	Lambda	10	30	\$0.0000	\$5.00
DynamoDB	DynamoDB	1	30	\$0.0025	\$1800.00
S3	S3	1	30	\$0.0230	\$1380.00
AppSync	AppSync	1	30	\$0.2500	\$150.00
SNS	SNS	1	30	\$0.5000	\$150.00

Subtotal: \$3085.00

Tax (0%): \$0.00

Total Due: \$3085.00

■■ Cost Optimization Opportunities

- Over-provisioning of serverless resources
- Lack of cost management and optimization
- Continuous running of services without proper scaling
- Misunderstanding of cost implications of serverless services

- Failure to use cost-effective alternatives or reserved capacity

■ Recommendations

- Conduct a thorough cost analysis and optimization review
- Implement proper scaling and cost management practices
- Use reserved capacity or savings plans for serverless services
- Optimize resource usage and configurations
- Educate the team on cost-effective practices and AWS pricing

■ Cost Analysis Commentary

You've turned a simple serverless project into a financial disaster, burning through \$3000 in 30 days like a kid in a candy store with a credit card. Maybe next time, try not to use a sledgehammer to crack a nut.

■ Suggested Payment Options

- Take out a second mortgage on your house
- Sell the CFO's shares (they'll understand... eventually)
- Start an OnlyFans for cloud architecture disasters
- Liquidate your 401(k) - retirement is overrated anyway
- Organize a company bake sale (you'll need about 10,000 cupcakes)
- Apply for AWS's 'Most Creative Waste' scholarship

** Payment plans available for those who still have assets remaining after this billing cycle.*

This is a simulated AWS bill for educational and demonstration purposes only.
